

Google Map iFrame Setup Guide

The admin can configure Google map iframe from **System Settings > General Settings > General tab > Basic sub-tab**.

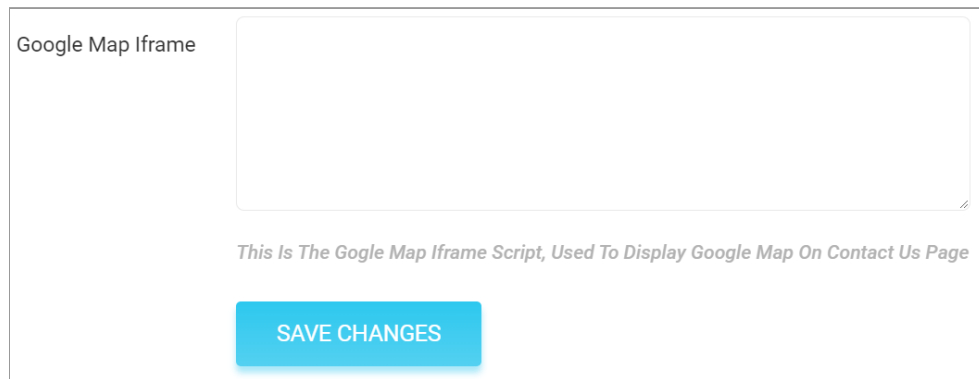

Fig. 1: Google Map iFrame Settings at Admin-end

The steps to be followed are:

1. Visit **Google maps** and search the place or address whose location is to be embedded.

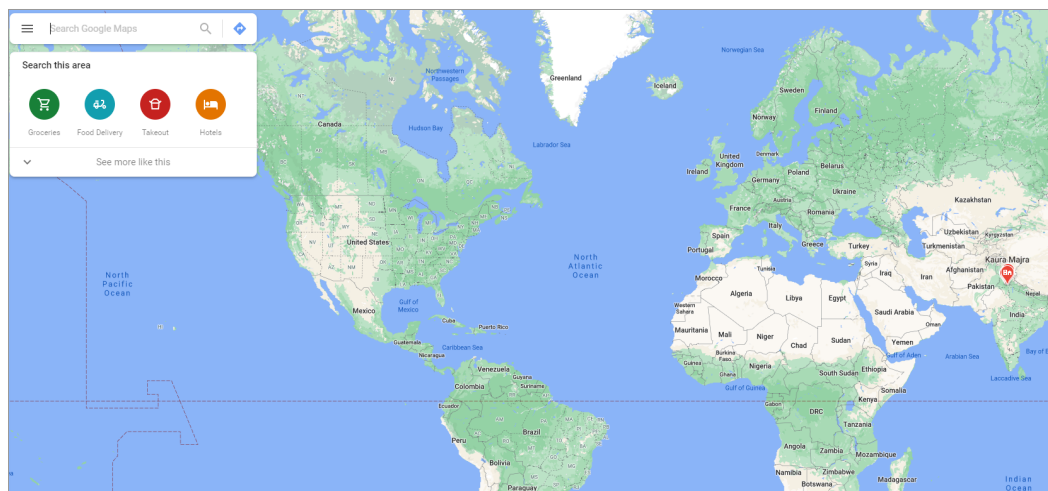

Fig. 2: Search Location on Google Maps

2. Once the location has been searched, click on the **'Share'** button provided on the left side navigation bar.

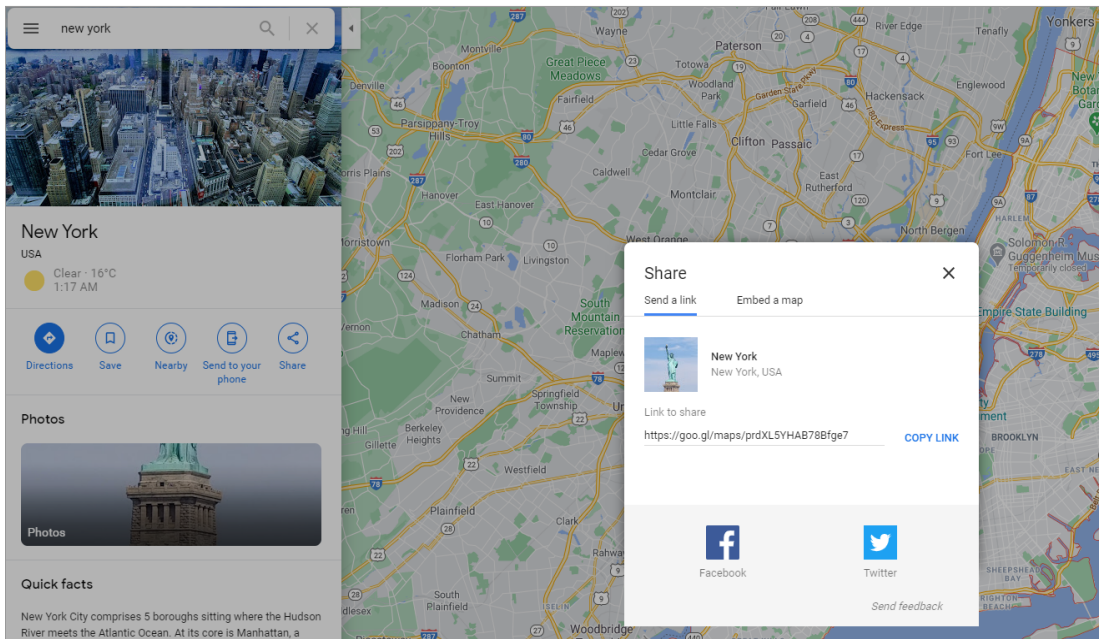

Fig. 3: 'Share' pop-up menu

3. A pop-up box will appear which will display two tabs. Click on the **'Embed a Map'** tab as shown below.

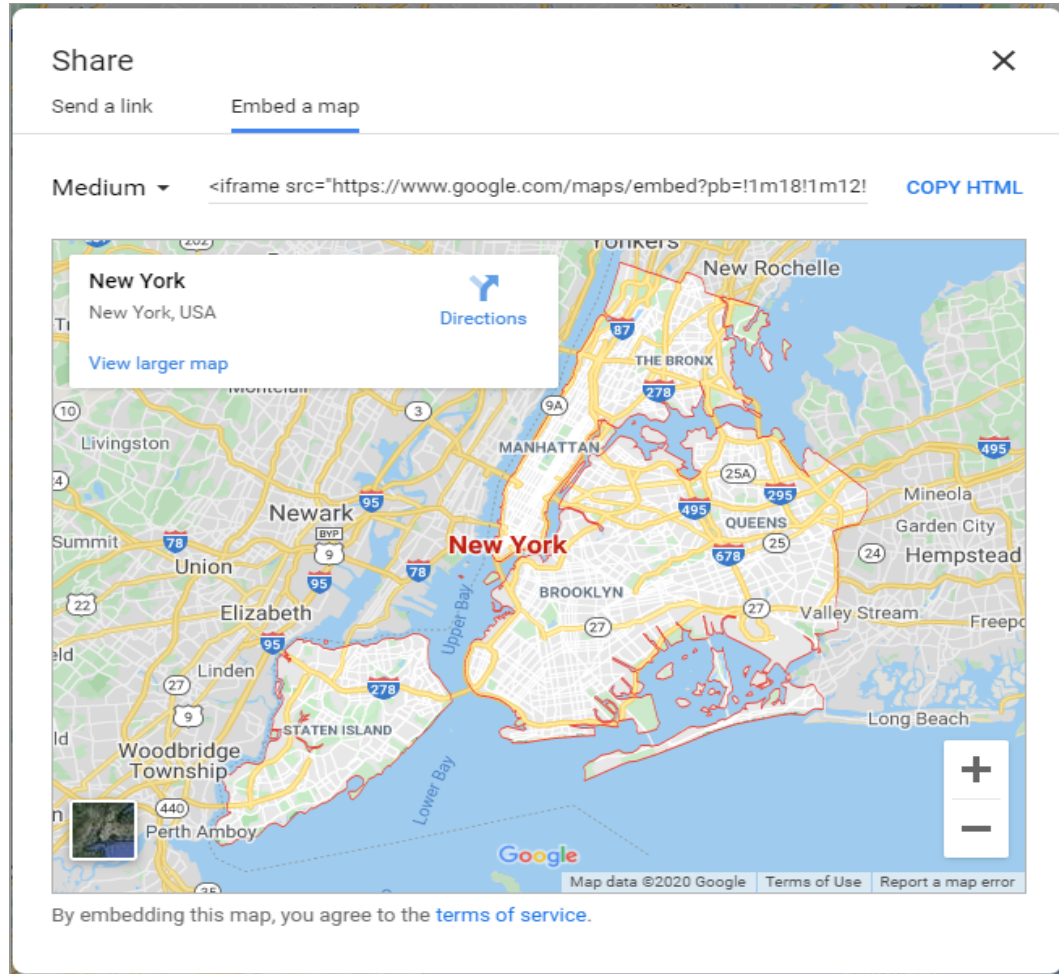

Fig. 4: 'Embed a Map' tab

4. Click on the '**Copy HTML**' button provided besides the iframe. The iframe will be copied. Paste this iframe in the dashboard settings as shown in [figure 1](#).

Output -

Once the iframe has been saved in the admin panel, please visit the **Contact Us** navigation page at the front-end. The embedded map will be displayed below the contact details. An example of how the output looks is shown in the figure 5 below.
