New Release Features

Simplified Product Form

Starting from version 3.2, a simplified product form will streamline the process of adding products, making it faster and more efficient for sellers. The new form also comes with enhanced sections, ensuring a smoother and more user-friendly experience.

Hourly Rental Options

The platform now includes an hourly pricing option in addition to daily, weekly, and monthly rates. Sellers can set rental prices on an hourly basis and buyers can easily book products for specific hours by selecting the desired date and time.

Dynamic Pricing for Varied Rental Durations

The latest version introduces flexible rental options, allowing sellers to offer products for hourly, daily, weekly, and monthly durations. Sellers can set different prices for each rental period, buyers can now choose a rental duration that best fits their needs.

Flexible Payment Options

For rentals exceeding one month, buyers can either make the full payment upfront or opt for an installment plan. With this option, they only need to pay an upfront amount set by the seller, while the remaining balance can be paid over time in multiple installments.

Distance-Based Shipping Costs

The new version introduces a distance-based shipping module, allowing sellers or admin to set shipping charges according to the delivery distance. This ensures a more accurate and fair pricing system.

Admin Dashboard Enhancements

The latest version features a newly integrated admin theme, enhancing the overall look and feel of the admin panel. This updated design ensures a more modern, intuitive, and user-friendly interface.

Rental Capabilities
